ALL RIGHTS RESERVED

No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (Operations Staff, P.O. Box 765, Schenectady, New York 12301), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1978 articles are the same as those shown for current articles.

CONTENTS OF VOLUME 15

Number 1, February 1978

Irma Åstrand and Francesco Gamberale. Effects on Humans of Solvents in the Inspiratory Air: A Method for Estimation of Uptake. . . 1

Betty B. Hoskins and E. W. Hupp. Methylmercury Effects in Rat, Hamster, and Squirrel Monkey. Lethality, Symptoms, Brain Mercury, and Amino Acids. 5

David R. Mouw, Judy G. Wagner, Ken Kalitis, Arthur J. Vander, and Gilbert H. Mayor. The Effect of Parathyroid Hormone on the Renal Accumulation of Lead. 20

Satya V. Chandra and Girja S. Shukla. Manganese Encephalopathy in Growing Rats. 28

E. E. Dumelin, C. J. Dillard, and A. L. Tappel. Breath Ethane and Pentane as Measures of Vitamin E Protection of *Macaca radiata* against 90 Days of Exposure to Ozone. 38

A. Morgan and A. Holmes. The Fate of Lead in Petrol-Engine Exhaust Particulates Inhaled by the Rat. 44

A. A. Mylroie, L. Moore, B. Olyai, and M. Anderson. Increased Susceptibility to Lead Toxicity in Rats Fed Semipurified Diets. 57

Anthony Savino, Mirzda L. Peterson, Dennis House, Alvis G. Turner, Harvey E. Jeffries, and Robin Baker. The Effect of Ozone on Human Cellular and Humoral Immunity: Characterization of T and B Lymphocytes by Rosette Formation. 65

Kenneth Rosenman. Benefits of Saccharin: A Review. 70

H. Cook, D. R. Helland, B. H. VanderWeele, and R. J. DeJong. Histotoxic Effects of Polybrominated Biphenyls in Michigan Dairy Cattle. 82

S. K. Tandon, D. K. Saxena, J. S. Gaur, and Satya V. Chandra. Comparative Toxicity of Trivalent and Hexavalent Chromium. Alterations in Blood and Liver. 90

David J. Hoffman and Kirby I. Campbell. Embryotoxicity of Irradiated and Nonirradiated Automotive Exhaust and Carbon Monoxide. . 100

M. Navrátil, K. Morávková, and F. Trippé. Follow-up Study of Pleural Hyalinosis in Individuals Not Exposed to Asbestos Dust. . . 108

Margaret Deane and George Sanders. Annoyance and Health Reactions to Odor from Refineries and Other Industries in Carson, California, 1972. 119

Ruth Lilis, William V. Lorimer, Sidney Diamond, and Irving J. Selikoff. Neurotoxicity of Styrene in Production and Polymerization Workers. 133

Klara Miller, Robert I. M. Handfield, and Elliott Kagan. The Effect of Different Mineral Dusts on the Mechanism of Phagocytosis: A Scanning Electron Microscope Study. 139

J. Malcolm Harrington, Edward L. Baker, Jr., David S. Folland, John W. Saucier, and S. H. Sandifer. Chlordane Contamination of a Municipal Water System. 155

Paul D. Altland, Milton G. Parker, and Howard F. Brubach. Effects of Graded Concentrations of Cigarette Smoke on Plasma Enzyme, Corticosterone, and Body Temperature in Rats. 160

Book Reviews. 170

Number 2, April 1978

D. L. Hamilton and M. W. Smith. Inhibition of Intestinal Calcium Uptake by Cadmium and the Effect of a Low Calcium Diet on Cadmium Retention. 175

Kōji Nogawa, Arinobu Ishizaki, and Shunichi Kawano. Statistical Observations of the Dose–Response Relationships of Cadmium Based on Epidemiological Studies in the Kakehashi River Basin. 185

Lawrence J. Folinsbee, Steven M. Horvath, John F. Bedi, and James C. Delehunt. Effect of 0.62 ppm NO_2 on Cardiopulmonary Function in Young Male Nonsmokers. 199

Yoshinori Itokawa, Kosuke Nishino, Machiko Takashima, Toshikazu Nakata, Hiroshi Kaito, Eiich Okamoto, Kazuyuki Daijo, and Juichi Kawamura. Renal and Skeletal Lesions in Experimental Cadmium Poisoning of Rats. Histology and Renal Function. 206

David G. Thawley, Sara E. Pratt, and Lloyd A. Selby. Antagonistic Effect of Zinc on Increased Urine δ-Aminolevulinic Acid Excretion in Lead-Intoxicated Rats. 218

S. K. Khanna, L. P. Srivastava, and G. B. Singh. Toxicity Studies on Metanil Yellow in Rats. 227

Robert T. Christian and June Nelson. Coal: Response of Cultured Mammalian Cells Corresponds to the Prevalence of Coal Workers Pneumoconiosis. 232

Tord Kjellström, Karin Borg, and Birger Lind. Cadmium in Feces as an Estimator of Daily Cadmium Intake in Sweden. 242

Anthony P. Polednak. Long-Term Effects of Radium Exposure in Female Dial Workers: Differential White Blood Cell Count. 252

Nurtan A. Esmen, Yehia Y. Hammad, Morton Corn, Diane Whittier, Nancy Kotsko, Martin Haller, and Russell A. Kahn. Exposure of Employees to Man-Made Mineral Fibers: Mineral Wool Production. 262

R. Lauwerys, J. P. Buchet, H. Roels, and G. Hubermont. Placental Transfer of Lead, Mercury, Cadmium, and Carbon Monoxide in Women. I. Comparison of the Frequency Distributions of the Biological Indices in Maternal and Umbilical Cord Blood. 278

Harry A. Roels, Jean-Pierre Buchet, Robert Lauwerys, Pierre Bruaux, François Claeys-Thoreau, Alphonse Lafontaine, Jean van Overschelde, and Geert Verduyn. Lead and Cadmium Absorption among Children Near a Nonferrous Metal Plant. A Follow-up Study of a Test Case. 290

Ruth Thomson, T. A. Kilroe-Smith, and Ian Webster. The Effect of Asbestos-Associated Metal Ions on the Binding of Benzo (*a*) pyrene to Macromolecules *in Vitro*. 309

Book Reviews. 320

Announcements. 325

Number 3, June 1978

Harry O. Corwin and Frederick J. Gottlieb. Anthracene-Induced Melanotic Tumors in *Drosophila*. 327

Alison Macfarlane. Daily Mortality and Environment in English Conurbations. II. Deaths during Summer Hot Spells in Greater London. . 332

M. H. Wong, K. C. Chan, and C. K. Choy. The Effect of the Iron Ore Tailings on the Coastal Environment of Tolo Harbour, Hong Kong. . 342

Karen Buehler Fennikoh, H. I. Hirshfield, and T. J. Kneip. Cadmium Toxicity in Planktonic Organisms of a Freshwater Food Web. . 357

Jeames A. Wagner, Steven M. Horvath, and Thomas E. Dahms. Cardiovascular Adjustments to Carbon Monoxide Exposure during Rest and Exercise in Dogs. 368

Carol Rice, Alf Fischbein, Ruth Lilis, Laszlo Sarkozi, Steven Kon, and Irving J. Selikoff. Lead Contamination in the Homes of Employees of Secondary Lead Smelters. 375

Monica Nordberg. Studies on Metallothionein and Cadmium. . . . 381

H. Babich and G. Stotzky. Influence of pH on Inhibition of Bacteria, Fungi, and Coliphages by Bisulfite and Sulfite. 405

Mary O. Amdur, Marc Dubriel, and Donald A. Creasia. Respiratory Response of Guinea Pigs to Low Levels of Sulfuric Acid. 418

Richard B. Schlesinger and Morton Lippmann. Selective Particle Deposition and Bronchogenic Carcinoma. 424

Pavel Hobza and Josef Hurych. Quantum Chemical Study of Properties and Reactivity of Quartz Dust. I. Electronic Structure of α-Quartz. 432

Tee Lamont Guidotti. The Higher Oxides of Nitrogen: Inhalation Toxicology. 443

Carl-Gustaf Elinder, Tord Kjellström, Lars Linnman, and Göran Pershagen. Urinary Excretion of Cadmium and Zinc Among Persons from Sweden. 473

Mirdza L. Peterson, Shirley Harder, Nicholas Rummo, and Dennis House. Effect of Ozone on Leukocyte Function in Exposed Human Subjects. 485

J. P. Buchet, H. Roels, G. Hubermont, and R. Lauwerys. Placental Transfer of Lead, Mercury, Cadmium, and Carbon Monoxide in Women. II. Influence of Some Epidemiological Factors on the Frequency Distributions of the Biological Indices in Maternal and Umbilical Cord Blood. 494

F. P. Ellis and Frieda Nelson. Mortality in the Elderly in a Heat Wave in New York City, August 1975. 504

H. Babich and G. Stotzky. Atmospheric Sulfur Compounds and Microbes. 513

Book Review. 532

Announcement. 533

Author Index for Volume 15. 534

The Subject Index for Volume 15 will appear in the December 1978 issue as part of a cumulative index for the year 1978.

INSTRUCTIONS TO AUTHORS

Manuscripts. Papers may represent original research in any of the disciplines now concerned with man-environmental relationships; it is anticipated that the relevance of the findings to broad problems of environmental biology and environmental medicine will be considered. Analytical and integrative reviews are equally eligible. The editorial emphasis of the Journal is on research concerning health effects of environmental alterations, broadly considered; engineering and control efforts are well served elsewhere.

Selected Book Reviews will be included.

Submission of Manuscripts. These should be submitted in duplicate to any member of the Board of Editors or to ENVIRONMENTAL RESEARCH, Editorial Offices, Environmental Sciences Laboratory, Mount Sinai School of Medicine, Fifth Avenue and 100th Street, New York, New York 10029. Further, prior review of the paper may be undertaken with a member of the Board of Consulting Editors, especially one with particular competence in the area concerned (as, environmental physiology, epidemiology and biostatistics, ecology, occupational medicine, toxicology, anthropology, climatology, air pollution, environmental medicine, geophysics, etc.); this will often expedite consideration of the paper.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Environmental Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

All papers will be published in English. It is preferable that papers be submitted in English to ensure faithfulness to the author's meaning. If necessary, however, a translation will be arranged.

Form of Manuscript. Manuscripts should be typewritten (not mimeographed) with double or triple spacing and wide margins on high quality bond paper. Subdivision of the article into *Abstract* (50–200 words), *Introduction, Materials and Methods, Results, Discussion, Acknowledgments* and *References* is recommended. However, variations of this format are acceptable if they provide clearer expression of the subject. In addition, section headings are often useful.

The first page of the manuscript should contain the article title, author's name, and affiliation (include zip code where applicable). The second page should contain a proposed running head of fewer than 40 characters and the address of the person to whom proofs are to be sent. In the upper left-hand corner of each following page (including Reference pages, Tables, etc.) please type a shortened form of the title and the surname of the senior author. Please also number each of these pages.

Abbreviations. Follow the usage established by *Chemical Abstracts.* If others are utilized define on first use.

Figures and Tables. Number all figures consecutively with arabic numerals; legends should be typed together on a separate sheet. Lettering on the original figures should be large enough to take a reduction of 50–60 per cent. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8½″ × 11″; grid lines that are to show in the engraving should be inked in black. Photographs should be glossy prints (5″ × 7″ or 8″ × 10″) with strong contrasts. X-rays should be right-reading glossy prints.

Tables are to be typed on separate pages and numbered with arabic numerals; a table title should be included.

Footnotes. Footnotes in the text are identified by superscript *numerals* and listed on a separate sheet; in the *tables* by superscript *letters* and placed at the bottom of the table.

References. These are to be cited in the text by the author's name and year of publication. References should be listed alphabetically at the end of the paper in the following order:

Curry, A. S. (1963). Acidic and neutral poisons. *In* "Progress in Chemical Toxicology" (A. Stolman, Ed.), Vol. 1, pp. 135–155, Academic Press, New York.

Waller, R. E., Commins, B. T., and Lawther, P. J. (1965). Air pollution in a city street. *Brit. J. Industr.* **22**, 128–138.

The names of journals should be abbreviated according to the *Index Medicus* or Chemical Abstracts' *Service Source Index.* Include in the reference list articles that are "in press," but incorporate in the text or use footnotes for "manuscript in preparation," "personal communication," or "unpublished observations."

Reprints. A reprint order form will accompany galley proofs. The senior author receives 50 reprints free of charge, and additional copies may be ordered.

Correspondence. Editorial communications should be addressed to ENVIRONMENTAL RESEARCH, Editorial Offices, Environmental Sciences Laboratory, Mount Sinai School of Medicine, Fifth Avenue and 100th Street, New York, N. Y. 10029. Business correspondence and information concerning subscriptions should be addressed to Academic Press, Inc., Journal Production Department, 111 Fifth Avenue, New York, N. Y. 10003.
